DETAILED ACTION

Election/Restrictions

1. The restriction requirement of February 11, 2004 has been withdrawn. Subsequently, applicant's arguments with regard to the previous restriction requirement, filed on March 11, 2004, are moot in view of a new restriction requirement set forth in this Office action.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. **Claims 1-20**, drawn to an air pathway clearance device, classified in class 128, subclass 848.

II. **Claims 21-24**, drawn to a method of treating sleep apnea, classified in class 128, subclass 898.

3. The inventions are distinct, each from the other because of the following reasons: Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus as independently claimed can be used to practice another and materially different process, such as one that does not require creating negative pressure within the airtight zone and utilizing the vacuum from this negative pressure to maintain open air passages for the user.

Art Unit: 3743

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Andrea M. Ragonese** whose telephone number is **703-306-4055**. The examiner can normally be reached on Monday through Friday from 8 am until 4:30 pm.
